

EDUCATION

**Oriental College of Technology**  
Bachelor of Technology in Computer Science (BTech in CS); GPA: 8.10

Bhopal, MP, India  
Oct 2021 - June 2025

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, HTML, CSS, Java
- **Databases:** SQL, NoSQL , MongoDB , Postgresql
- **Libraries:** NextJs, ReactJs, React Native , NodeJs , Redux, Redux Toolkit, Socket.io , LangChain , Zustand, Material UI,Bootstrap, Tailwind, ApexCharts , RechartJs, GSAP, Styled Components, ShadCN, NextUI, PWA , Ionic, Mongoose ,Prisma
- **Tools:** Node, NPM, Yarn, Vite, Webpack, Git, Vercel, Firebase, CI/CD, Appwrite , UX, AWS , Docker
- **Soft Skills:** Excellent communication, Troubleshooting, Problem Solving, Team Management, Decision Making

WORK EXPERIENCE

**Software Developer | Mushroom World Group**  
Qtee.ai ([Link](#))

Oct 2023 - Present

- Developed Qtee.ai using Next.js and LangChain library to automate call summaries for sales and support services.
- Introduced advanced AI-driven call auditing systems boosted quality assurance accuracy by 35% and cut down review time by 50%, significantly improving overall service standards.
- Enhanced platform customization and efficiency, leading to improved call handling and auditing processes.
- Currently used within my company with over 20+ dietitians, aimed at becoming a B2B product.

Dietitian Project

- Led full-stack development for dietitian applications using React Native and React, with Socket.IO integration for real-time chat.
- Achieved a user base of over 600+ users, enhancing the platform's reach and impact in the dietitian community.
- Created user-friendly, responsive interfaces that significantly improved client-dietitian interactions and user satisfaction.
- Ensured high code quality through thorough testing and reviews, successfully delivering a robust dietitian platform.

**Frontend Developer | Vain Innovation**

June 2023 - Sept 2023

- Specialized in front-end web development with a focus on React framework during internship at Vain Innovation.
- Worked on Admin Dashboard with various technologies like node.js, express.js, bootstrap 4, javaScript etc.
- Translated design concepts into functional components, ensuring seamless integration of visual elements.
- Gained valuable experience in dynamic React development environment, contributing to team success.

PROJECTS

**Dev Arena ( [Github](#) , [Live](#) )**

Feb 2024 – April 2024

- Developed Dev Arena, an online platform for student interaction and coding-related queries, using full-stack Next.js.
- Implemented a ranking system based on activity and upvotes for badge assignment to encourage participation.
- Designed intuitive and responsive user interfaces, ensuring accessibility and ease of use.
- Enhanced user engagement through gamification elements, leading to a more interactive learning experience.
- Added a views system to track and display the popularity of queries and posts, enhancing user engagement.

**FindX ( [Github](#) , [Live](#) )**

Jan 2023 – Feb 2023

- Created Find X, a dynamic web application to facilitate seamless interaction between employers and students.
- Implemented features for job and internship postings, resume submissions, and application management.
- Bridged the gap between employers and students by streamlining the recruitment process.
- Designed intuitive and responsive user interfaces to ensure ease of use for both employers and students.
- Promoted efficient recruitment workflows, improving the overall hiring process for employers and opportunities for students.

**Video Calling App ( [Github](#) , [Live](#) )**

May 2024 - Present

- Developing a video call application using Socket.IO and WebRTC to enable real-time communication.
- Implemented features for seamless video and audio calls, ensuring high-quality connections.
- Designed user-friendly interfaces that support easy initiation and management of video calls.
- Enhanced user experience by integrating real-time chat and screen sharing functionalities.

Other Projects

- Movie Rating App ( [Github](#) , [Link](#) )
- Awwwards website clone ( [Github](#) , [Link](#) )
- Apple Vision Pro Clone ( [Github](#) , [Link](#) )
- Hotel Odisej Clone ( [Github](#) , [Link](#) )
